Description

War is coming. Siren, the last remaining Water Guardian, goes out of hiding to gather her forces: an acolyte from a dying clan of powerful seers, a holy squire protected by a sentimental scientist, a lost dark elf seeking refuge in the Mercenary Guild, and twin sisters: a monk-in-training and a rising minstrel. The enemy is yet unknown, but the small group of fledglings fight their way to uncovering the truth.

This is actually the “Relaxed Edition” of Song of Pisces, a hack and slash RPG released by Senshi.Labs in May 2016. New features:

- Turn-based combat system.
- New monster battler art.
- Revised levels and skills.
- New battle and battle victory background music.
- More clues in the side quest narratives.
